Technical Paper Number 118

SELECTED POPULATION, HOUSING, AND AREA DATA, BY CENSUS TRACT, FOR 1970 - 1980

APRIL, 1985

RHODE ISLAND STATEWIDE PLANNING PROGRAM
265 Melrose Street
Providence, Rhode Island 02907
(401) 277-2656

The Rhode Island Statewide Planning Program is established by Chapter 42-11 of the General Laws as the central planning agency for state government. The work of the Program is guided by the State Planning Council, comprised of state, local, and public representatives and federal and other advisors. The Office of State Planning, a division of the Department of Administration, is the staff component of the Program.

The objectives of the Program are to plan for the physical, economic, and social development of the state; to coordinate the activities of governmental agencies and private individuals and groups within this framework of plans and programs; and to provide planning assistance to the Governor, the General Assembly, and the agencies of state government. The Program prepares and maintains the State Guide Plan as the principal means of accomplishing these objectives. The State Guide Plan is comprised of a series of functional elements which deal with physical development and environmental concerns, the economy, and human services.

This technical paper is one of a series prepared by the Office of State Planning. These papers present information developed through Program activities to state and federal agencies, local governments, and the public.

Program activities are supported by state appropriations and federal grants. The contents of this report reflect the views of the Statewide Planning Program, which is responsible for the accuracy of the facts and data presented herein. The contents do not necessarily reflect the official views or policies of other sponsoring agencies. This publication is based upon publicly-supported research and may not be copyrighted. It may be reprinted, in part or in full, with the customary crediting of the source.

PREFACE

This technical paper is designed to meet the need for standardized base data at the census tract level. In addition to a map of each census tract, this paper includes 1970 and 1980 population and housing data, persons per acre, housing units per acre, total land area, and total inland water area for 3 geographic areas: the state, cities and towns, and census tracts.

This paper is a product of the Office of State Planning's State Data Center Program for census dissemination as outlined in Task 407 of the Work Program for fiscal year 1985.

Staff responsible for preparation of this material are James A. Andrade, Principal Systems Analyst, John J. Deary, Jr., Principal Planner, Joyce Karger, Senior Planner, and Beverly A. Mourachian, Principal Clerk Typist.

Census tract graphics are reproduced from the Rhode Island Department of Community Affairs publication, Rhode Island Census Tracts, September, 1971 with permission.

INTRODUCTION

Changing boundary lines and census tract partitioning for the 1970 census necessitated the updating of Rhode Island's 1960 land and inland water areas data. (See Appendix A for the tracts divided for the 1970 census and Appendix B for the tracts with boundary changes). The base data for the 1960 land area, inland water, and total areas were taken from Rhode Island Area of Cities and Towns by Census Tracts, a report published in 1963 by the Rhode Island Development Council. Area measurements were derived using an overlay of one-tenth of an inch squares on a quadrangle map at a scale of 1 inch to 2,000 feet (1:24,000).

The 1970 revised land area, revised inland water, and revised total area were generated as a result of interpretations of aerial photography done for the Southeastern New England Water and Related Land Use (SENE) study.
